

Average 365-Day Return After Buy Recommendations

The average **365-day return after a Buy recommendation is 19.4%**, based on 36,967 recommendations with return data. The median return is 8.6%, indicating that while the average is pulled higher by some exceptional performers, most Buy recommendations deliver positive but more modest returns.

Key Findings

Return Distribution:

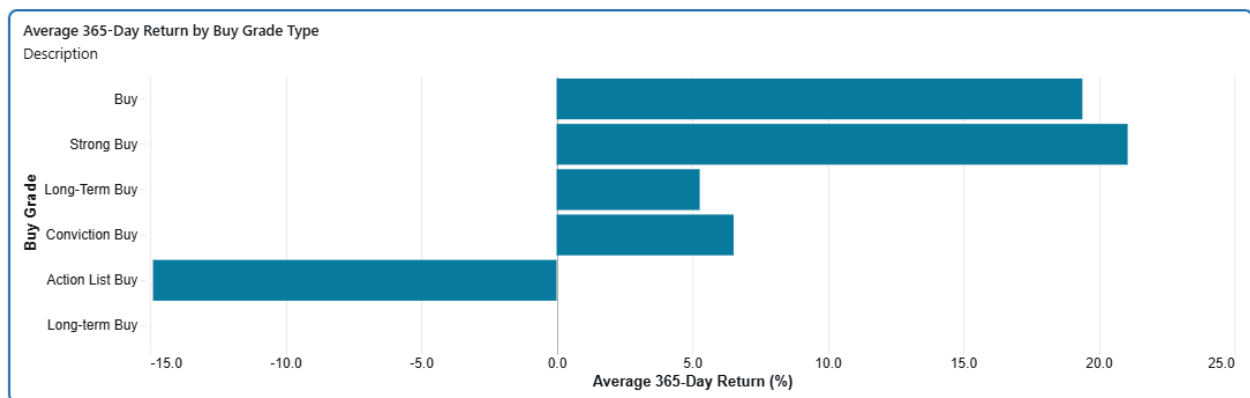

- **40.4%** of Buy recommendations delivered returns between 0% and 25%
- **16.9%** delivered returns between 25% and 50%
- **14.5%** delivered returns above 50%
- **21.2%** had negative returns between -25% and 0%
- Only **7.0%** had losses exceeding 25%

The distribution shows that **71.8% of Buy recommendations resulted in positive returns** over the 365-day period.

Performance by Buy Grade:

"Strong Buy" recommendations slightly outperformed standard "Buy" ratings, with an average 365-day return of **21.1%** versus **19.4%** for regular Buy ratings. However, both grades showed similar median returns (10.2% vs 8.6%), suggesting the difference is driven by a few high-performing outliers.

Return Range:

Returns ranged from **-97.5%** (near-total loss) to **+4,586%** (exceptional gain), with the middle 50% of recommendations (25th to 75th percentile) delivering returns between **-2.5% and +32.3%**.
